Introduction

Hunters and Beasts is a turn-based board game designed for four players, set in a world filled with mysterious creatures and dangerous hunts. Each player takes on the role of a hunter whose objective is to identify the correct target among many beasts roaming the board.

The gameplay requires not only courage, but also strategy and observation skills — beasts move according to different behavioral patterns, and players must use these patterns to deduce which one is their true target.

The goal of the game is to identify the correct beast, hunt it down, and safely escape with the loot before other players do — or before becoming prey themselves.

Game Setup

- **Determine the turn order — turns proceed in the following sequence:**

  P1 → P2 → P3 → P4.

- **Prepare the card decks:**
  - **Common Cards (white back)** – shuffle and place in one pile

    Trophy Cards (black dot on the back) – shuffle and place in a separate pile

- **Prepare the Beast health board** (6 health tracks):

  Set Beast HP to **30** using glass markers

- **Each player (Hunter):**
  - Takes their health board labeled (P1, P2, P3, P4)
  - Sets their HP to **30** using a glass marker

- **Each Hunter draws a Beast Behavior card (described at the end of the rulebook):**
  - The drawn card determines which Beast must be hunted to fulfill the **victory condition**

- After completing these steps, the game can begin according to the rules described in **"Turn Structure"**

Turn Structure

1. **Player Movement**
   Pierwszy gracz porusza swojego kłusownika na dowolne dozwolone pole. Ruch możliwy jest wyłącznie pomiędzy ponumerowanymi polami.

   W jednej turze gracz musi wykonać ruch o minimum **1 pole i maksimum 5 pól.**

2. **Input Movement**
   Wykonany ruch należy wprowadzić do aplikacji.

3. **Attack Phase**
   Jeśli gracz znajduje się na polu sąsiadującym z Bestią lub innym Kłusownikiem, może wykonać atak. Atak może być również wykonany przed ruchem

   - Jeśli w zasięgu znajduje się więcej niż jeden cel, gracz musi wybrać jeden z nich.
   - Wyniki ataku oraz ewentualnego kontrataku należy odnotować na tablicy życia.

4. **Other Players' Turns**
   Gracze 2, 3 i 4 wykonują swoje tury według tej samej kolejności działań.

5. **Beast Phase**
   Po zakończeniu tur wszystkich graczy następuje tura bestii.

   - Trigger the Beast turn in the application
   - Beasts move according to their behaviors — adjust their positions on the board
   - If a Beast ends its movement adjacent to a player (even if it didn't move), it attacks all adjacent players
   - Since this is a Beast attack, Hunters cannot counterattack

6. **Continue Gameplay**

   Return to step 1 and begin the next round.

Game Elements

Beasts

Beasts are the targets of the hunt. Each **Beast** has a unique **Behavior** that determines how it moves.

- When a **Beast** is killed, remove it from the application (right-click)
- Its **Behavior** is revealed to all players and should be noted visibly
- The player who killed the **Beast** receives its **Loot** (**Beast** token) and places it on their health board
- At the end of its turn, a **Beast** attacks all adjacent **Hunters**

Hunters

Hunters are player-controlled characters represented by tokens.

Each **Hunter** must locate and hunt their assigned **Beast** by identifying it through its **Behavior**.

If a **Hunter** dies:

- If killed by another player → their **Loot** goes directly to the killer
- Otherwise → **Loot** is dropped on the tile where they died

To pick up dropped **Loot**, a player must perform an attack targeting the token.

After death, a Hunter:

- **Loses all Loot**
- **Loses all Cards (Common and Trophy)**
- **Must respawn**

A Hunter may attack one adjacent target (Beast or Hunter) at the start or end of their turn.

Cards

- **Common Card –** drawn after performing an attack
- **Trophy Card** – gained after killing a **Beast** or **Hunter**

Limits:

- Max 3 **Common Cards** in hand
- No limit on **Trophy Cards**

If exceeding the limit, discard one **Common Card.**

Cards can be played at any time unless stated otherwise.
After use, they go to the discard pile.

If a deck runs out, reshuffle the discard pile to form a new deck.

Loot

Loot is the reward for killing **Beasts**.

- **Max 2 Loot tokens**
- **Each Loot increases attack power:**
  - **0 Loot → D8**
  - **1 Loot → D10**
  - **2 Loot → D12**

If a player gains a third **Loot**, they must choose two to keep.

Loot can only be taken by killing the **Hunter** who holds it.

Behavior

Behavior determines how a **Beast** moves.
Each **Beast** has a unique **Behavior**, and players must identify their target based on it.

Victory Condition

A player wins when they:

- Obtain the **Loot** of their assigned Beast
- Reach a tile adjacent to another player's starting position

---

Attack

An attack can be performed by:

- **Hunter vs Beast**
- **Hunter vs Hunter**
- **Beast vs Hunter**

Rules:

- Attack value is determined by a dice roll **(D8 by default, increased by Loot)**
- After attacking, a **Hunter** draws a **Common Card**
- You cannot attack in the same turn you pick up **Loot**

If the target survives and is in range, it performs a counterattack**.**

Counterattack

Performed by the defending Hunter or Beast:

- Roll: D6 + damage die (D8 / D10 / D12)
- If D6 is odd → counterattack fails
- If D6 is even → damage equals the second die

Respawn

Respawn allows a player to return after death:

- On the next turn, return to the starting tile

- Each turn, roll D8 to respawn
- Result must be ≥ threshold

Threshold starts at 8 and decreases by 1 each turn.

After a successful respawn, the player returns with 30 HP.

Beast Behaviors

- **Fellowship** – follows other beasts
- **Traveller** – visits different biomes on the map
- **Seek Furthest** – chases the farthest player
- **Patrol Area** – patrols designated points
- **Predator** – hunts players
- **Pumpkin Lover** – moves between pumpkins on the map
